

INVESTMENT REPORT

Strategy

The Fund's objective is to achieve optimal capital growth over the long term through the active management of a portfolio of large-capitalisation stocks based primarily in a member country of the European Union or the European Economic Area.

The investment strategy is based on a fundamental analysis: the stock selection process is based on the activity of companies, their governance, financial structure, and development prospects. The fund aims to identify companies with dominant positions, high reinvestment capacity, and low debt.

The recommended investment horizon is 5 years. The reference currency is the Euro.

Markets

Contrary to what one might have expected, European markets saw strong growth at the beginning of the year. The Euro Stoxx 50 rose by +7.98%, the Stoxx Europe 600 increased by +6.29%, and the CAC 40 was up by +7.72%.

Sector wise, the Consumer Products & Services Sector led the charge at +10.79%, while the Utilities Sector trailed at +1.36%.

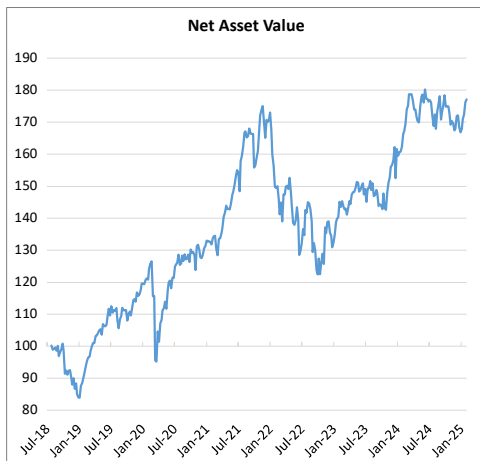

The Fund

FFM European Selection ended the month (26.12.2024 - 30.01.25) up by +6.15%, slightly underperforming all relevant indices over the same period, with the Euro Stoxx 50 up by +7.82%, the Stoxx Europe 600 up by +6.24%, and the CAC 40 up by +7.97%.

The monthly top three consisted of Brunello Cucinelli (+18.22%), Hermès (+17.31%), and Gaztransport et Technigaz (+15.01%). On the other side, we find L'Oréal (-3.61%), Novo Nordisk (-2.77%), and Ferrari (+1.13%).

During the month, we sold Sika and L'Oréal, as they struggled to show better expected growth.
